Education

Lovely Professional University — Punjab, India
B.Tech in Computer Science and Engineering — *Aug 2022 – May 2026*

Experience

Skillion — Oct 2025 – present
Full Stack Developer (full-time) — *Remote*

- Run production for **Reconexa**, an AI reconciliation product live with two clinics: Docker services on Dokploy and Hetzner, Neon Postgres with auto-suspend, Doppler secrets, and Sentry, PostHog and Uptime Kuma monitoring.
- Moved CI off the production host to Blacksmith runners; the product ships behind **3,000+ automated tests** with passkeys, 2FA and a full audit trail.
- Deployed company websites to **Cloudflare Workers** with OpenNext and on-demand ISR; cut bot traffic that had used **38% of Worker CPU** and blog page weight from 6.5 MB to 0.2 MB.
- Migrated company email from Amazon WorkMail to **Google Workspace** with no lost mail and no downtime, verified with imapsync; set up SPF, DKIM and DMARC across all company domains.
- Moved about 700 files across 13 owner accounts into a shared drive with Drive API scripts that kept original file links working; every step logged, resumable and verified.
- Self-hosted Twenty CRM on the company server with per-service memory limits; put internal tools behind Cloudflare Access.

The Joy Junction — May 2025 – Dec 2025
Full Stack Developer (part-time) — *Remote*

- Built and hosted the brand's e-commerce platform (MedusaJS 2, Next.js 15) on AWS Lightsail with PM2, Caddy and GitHub Actions deploys over SSH.
- Moved cache, event bus and workflows to Redis, cutting average API latency by **40%**; Algolia search under 200 ms; Razorpay webhooks for 99.9% reliable payments.

PrintSaathi — Feb 2025 – Apr 2025
Backend Development Intern — *Remote*

- Cut API latency by **70%** with Redis caching and SQL tuning; built a BullMQ queue handling **10,000+ tasks a day**; designed the MongoDB to PostgreSQL move with Prisma.
- Added tiered rate limiting, a GitHub Actions docs pipeline and a reproducible Nix dev environment; REST refactor cut error rates by 50%.

Projects

Self-hosted infrastructure | *Oracle Cloud, Tailscale, Dokploy, systemd, SOPS* — Aug 2026 – present

- Two-machine fleet on a private Tailscale network, managed from one Git repo: rebuild playbooks, SOPS-encrypted secrets, 5-minute health checks with Telegram alerts, and systemd-oomd to stop memory freezes.

NixOS configuration | *Nix flakes, Home Manager, disko, Btrfs, sops-nix* — Feb 2024 – present

- One flake builds my laptop and desktop from scratch, down to disk partitioning, with Btrfs snapshots, GPU switching, DNS ad blocking and CI builds.

Video transcoding pipeline | *AWS SQS, S3, EC2, ECS, ECR, Docker, FFmpeg* — Nov 2024 – Jan 2025

- Event-driven S3 to SQS to FFmpeg pipeline; running jobs on the worker's own EC2 host instead of ECS Fargate cut infrastructure spend by **60%**.

Proxmox home server | *Proxmox VE, Docker, Cloudflare Tunnel and Access* — Mar 2024 – Jan 2025

- Self-hosted 10+ sites and services behind Cloudflare Tunnel and Access, cutting hosting costs by **80%**.

Open source: EnvSync self-hosting | *Kubernetes, Helm, kind, Docker Compose* — Mar 2026

- Helm chart and Kubernetes bring-up for the full EnvSync stack: setup and migration jobs, RBAC, autoscaling and ingress (42 files, about 2,100 lines).

Technical Skills

Cloud: AWS (EC2, S3, SQS, ECS, ECR, Lightsail, Route 53, SES), Cloudflare (Workers, R2, Access, Tunnel), Oracle Cloud, Hetzner
Containers and CI/CD: Docker, Docker Compose, Kubernetes, Helm, Dokploy, GitHub Actions
Config and secrets: NixOS flakes, Home Manager, systemd, SOPS and age, Doppler
Observability: Sentry, PostHog, Prometheus, Grafana, Uptime Kuma
Networking and email: Tailscale, Cloudflare Tunnel, DNS, SPF, DKIM, DMARC, Google Workspace admin
Languages: Bash, Python, TypeScript, SQL

Certifications and Achievements

- **Passed Microsoft AZ-104 (Azure Administrator Associate)**, Apr 2025; certification now expired.
- **1st place at LPU, Hack the Block 2025** (Crewsphere ICP Hub India), Apr 2025, for SoundPrint, with a team of four.
- **Core team, Google Developer Student Club, LPU** (2022 – 2024): organised 5 events with 500+ attendees and mentored 20+ peers in web development and Linux.
