Education

Lovely Professional University — Punjab, India
B.Tech in Computer Science and Engineering — *Aug 2022 – May 2026*

Experience

Skillion — Oct 2025 – present
Full Stack Developer (full-time) — *Remote*

- Built **Reconexa** end to end as sole developer: an AI product that reads insurer and NDIS payment emails and marks invoices paid in Cliniko and Xero. Live with two physiotherapy clinics.
- Raised invoice extraction accuracy from **68% to 97.5%** by benchmarking LLMs against staff-verified invoices, with an OCR step that reads PDF text first and falls back to OCR.space or AWS Textract.
- Built a five-stage BullMQ email pipeline, bank-feed matching with Meilisearch, and a Playwright worker that records payments in Cliniko; passkeys, 2FA and a full audit trail; **3,000+ automated tests**.
- Built **skillionailabs.com** on Next.js 16 and Cloudflare Workers with an AI maturity diagnostic, an OpenAI chatbot and **Lara**, a voice agent on ElevenLabs and Twilio that emails call summaries and flags hot leads.
- Cut blog page weight from 6.5 MB to 0.2 MB, CMS payloads by 80% and code-quality issues from 206 to 0; built the Strapi CMS behind two company sites with an AI-assisted YouTube pipeline.
- Built internal AI tools: an RFP system that reviewed 114 RFPs and produced 7 proposals, a multi-model research pipeline with a self-hosted CRM that Claude drives over MCP, and a Jira retro tool used every sprint.

The Joy Junction — May 2025 – Dec 2025
Full Stack Developer (part-time) — *Remote*

- Built the brand's e-commerce platform from scratch on MedusaJS 2 and Next.js 15, with custom modules for search, Google sign-in, wishlists, coupons and a content admin.
- Integrated Algolia search with automatic product indexing, returning results in **under 200 ms**; moved cache, event bus and workflows to Redis, cutting average API latency by **40%**.
- Integrated Razorpay with webhook-driven order expiry and refunds for **99.9%** reliable payment processing; deployed to AWS Lightsail with GitHub Actions.

PrintSaathi — Feb 2025 – Apr 2025
Backend Development Intern — *Remote*

- Designed the move from MongoDB to PostgreSQL with Prisma: a 29-table schema, migrations and data-copy scripts.
- Cut API latency by **70%** with Redis caching of hot product data and SQL tuning; built a BullMQ email queue handling **10,000+ tasks a day**.
- Built coupon redemption, Algolia search and tiered rate limiting; refactored REST APIs, cutting error rates by **50%** and response times by 30%.

Projects

Video review platform (freelance, stealth startup) | *Next.js 16, Hono, Socket.IO, HLS*

- Built the whole web app for a Frame.io-style review product: resumable chunked uploads, a frame-accurate HLS player with pinned comments, and real-time collaboration over WebSockets.

SoundPrint | *React, Rust, Internet Computer, Spotify API* — Mar 2025 – Apr 2025

- Turns a listener's Spotify taste into generative art minted as an NFT; won 1st place at LPU in Hack the Block 2025. I built the on-chain side: Internet Identity login, minting and mainnet deployment.

Mini marketing CRM | *Next.js, Gemini, BullMQ, PostgreSQL, Docker* — May 2025

- Gemini turns plain-English audience descriptions into segment rules and drafts campaign copy; a Dockerised queue worker ingests bulk data and sends campaigns with delivery tracking.

Video transcoding pipeline | *AWS SQS, S3, EC2, ECS, Docker, FFmpeg* — Nov 2024 – Jan 2025

- Event-driven S3 to SQS to FFmpeg pipeline; running jobs on the worker's own EC2 host instead of ECS Fargate cut infrastructure spend by **60%**.

Technical Skills

AI and LLMs: OpenAI, Claude, Gemini, ElevenLabs, LangChain, n8n, MCP, OCR (AWS Textract), LLM evaluation
Languages: TypeScript, JavaScript, Python, SQL, Bash, Rust, Swift
Frontend: Next.js, React, Tailwind CSS, shadcn/ui, TanStack Query, Astro, Three.js
Backend and data: Node.js, Bun, Hono, Express, Django, BullMQ, Prisma, Drizzle, PostgreSQL, Redis, MongoDB, Meilisearch
Cloud and DevOps: AWS, Cloudflare Workers, Docker, Dokploy, GitHub Actions, Vercel, Sentry, NixOS

Certifications and Achievements

- **Passed Microsoft AZ-104 (Azure Administrator Associate)**, Apr 2025; certification now expired.
- **1st place at LPU, Hack the Block 2025** (Crewsphere ICP Hub India), Apr 2025, for SoundPrint, with a team of four.
- **Core team, Google Developer Student Club, LPU** (2022 – 2024): organised 5 events with 500+ attendees and mentored 20+ peers in web development and Linux.
